G. NARAYANAMMA INSTITUTE OF TECHNOLOGY AND SCIENCE

(AUTONOMOUS) (For Women)

Shaikpet, Hyderabad - 500 104

Department of Computer Science and Engineering

B.Tech Minor in Data Science

III B.Tech. I Semester – Lab Examinations Oct- 2026

Academic Year 2026-2027

Name: _____

Roll No: _____

R Programming Lab --- viva

Part A: Fill in the Blanks

1. The _____ function in R is used to determine the type of an object.
2. The _____ rule in R states that a shorter vector is repeated when performing operations with a longer vector.
3. The _____ function is used to combine objects column-wise in R.
4. A _____ loop is used to repeat a block of code for a fixed number of iterations.
5. The _____ function returns a list, whereas the sapply() function simplifies the result whenever possible.

Part B: Multiple-Choice Questions

Tick the correct option

1. Which of the following is a basic data type in R?

(a) Table (b) Numeric (c) Loop (d) Function

2. Which operator is commonly used to assign a value to a variable in R?

(a) == (b) != (c) <- (d) >=

3. Which of the following functions is used to create a matrix in R?

(a) vector() (b) matrix() (c) array() (d) data.frame()

4. Which of the following data structures can store elements of different data types in a single object?

(a) Vector (b) Matrix (c) List (d) Factor

5. Which of the following functions is used to combine objects row-wise in R?

(a) cbind() (b) rbind() (c) c() (d) sort()

SET-1

Illustrate the usage of Vector sub setting& Matrix sub setting.

illustrate summation, subtraction, multiplication, and division operations on vectors using vectors

SET-2

Write the command to create a new data frame containing the ‘age’ parameter from the existing data frame. Check if the result is a data frame or not. Also R commands for data frame functions cbind(), rbind(), sort()

SET-3

Write R command for i. Pie chart& 3D Pie Chart, Bar Chart to demonstrate the percentage conveyance of various ways for traveling to office such as walking, car, bus, cycle, and train
